Tell a Robot Story Game

Robo-Doodles

Draw a robot that flies.

Draw a robot that swims.

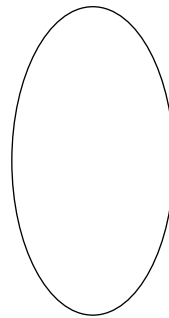

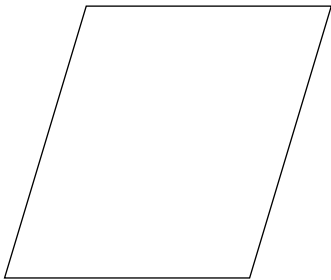

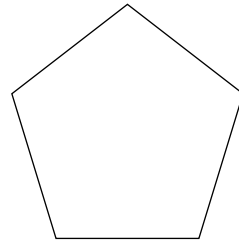

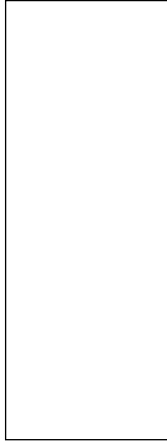

Draw your family as robots.

Draw a robot on wheels.

Draw a robot with lots of arms.

Draw a robot party.

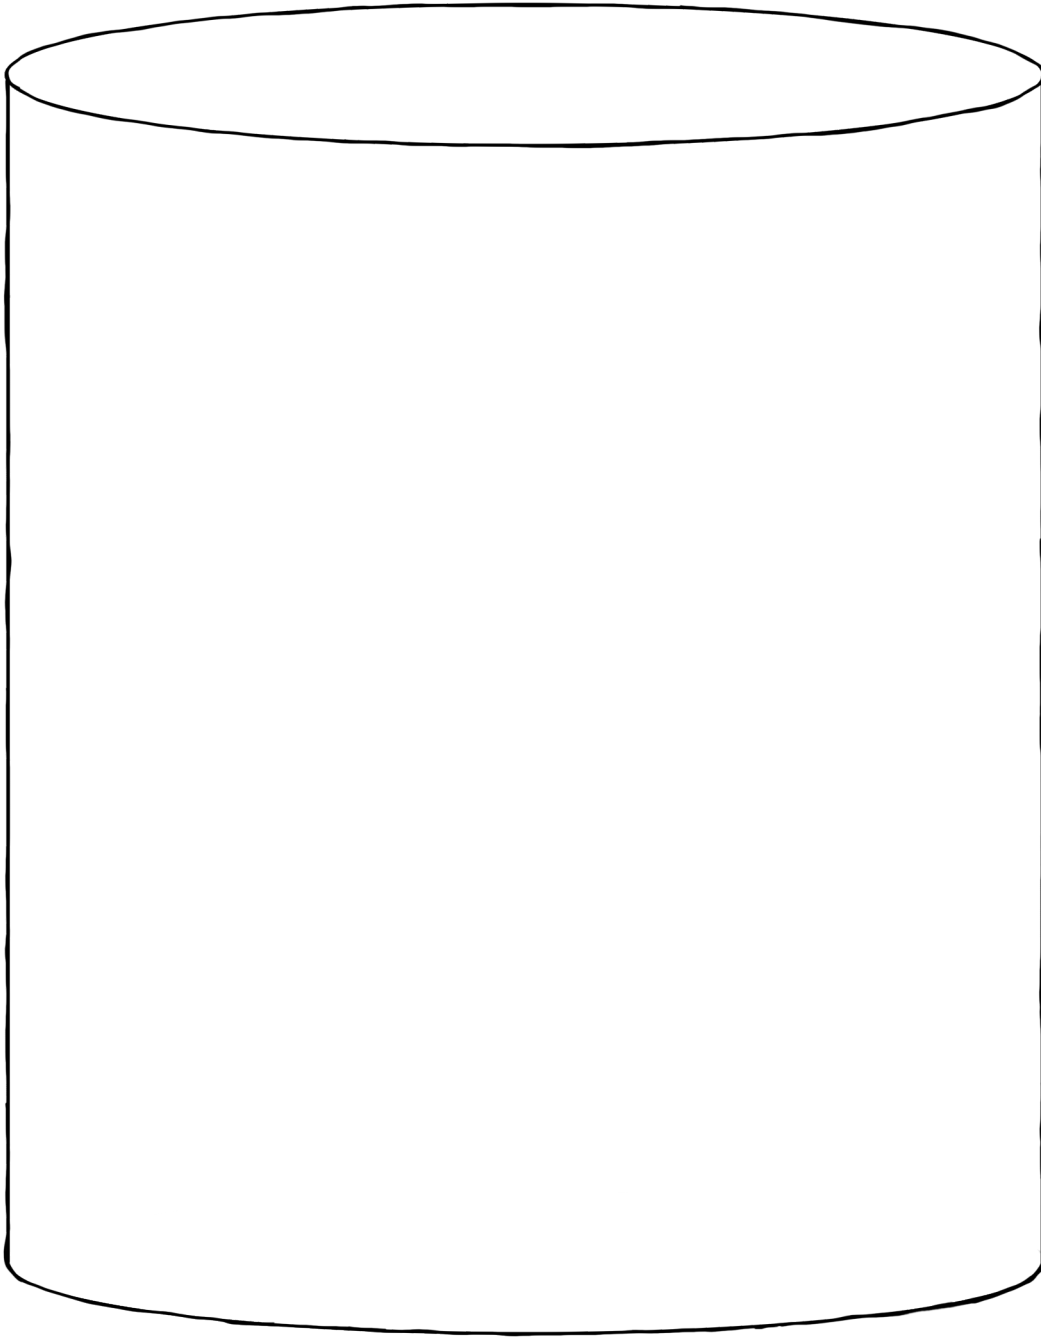

Turn these shapes into robots:

Fill this page with robots. How many different robots can you draw?

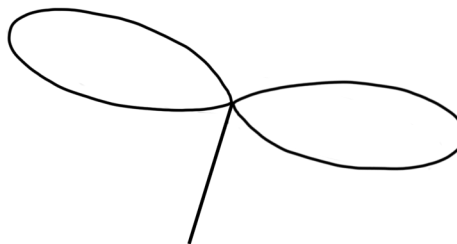

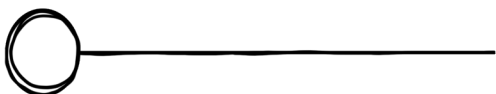

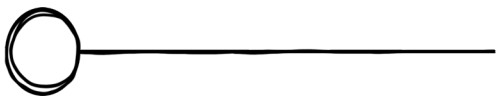

Color-Cut-Construct Robot

Color these robot parts, cut them out, and put together your own amazing paper robot.

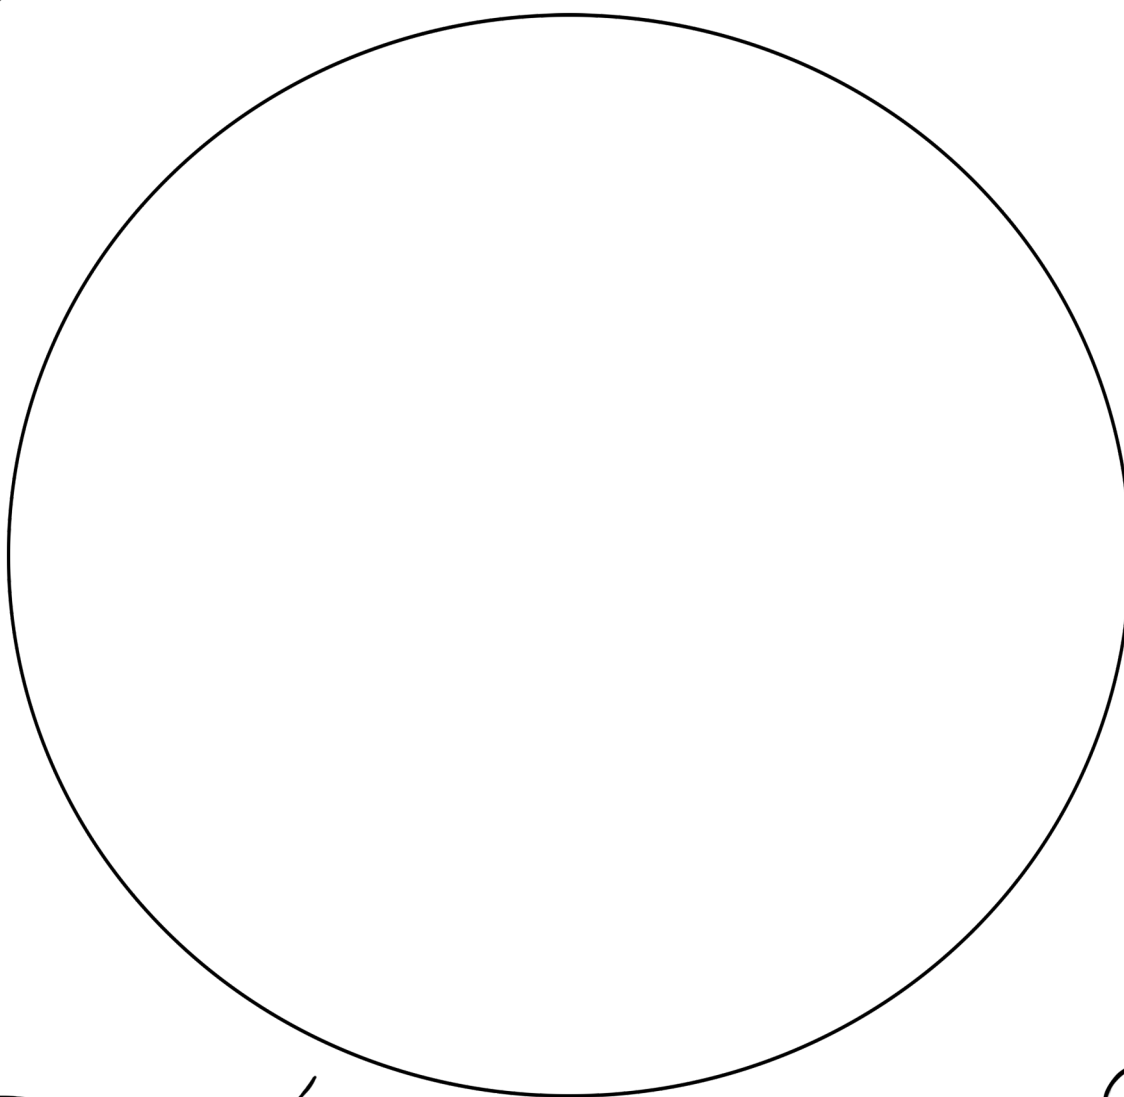

body

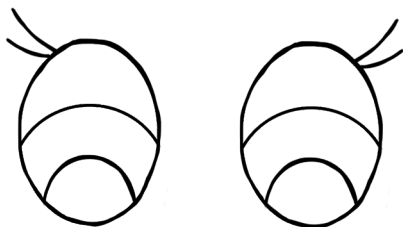

antennas

propellor

eyes

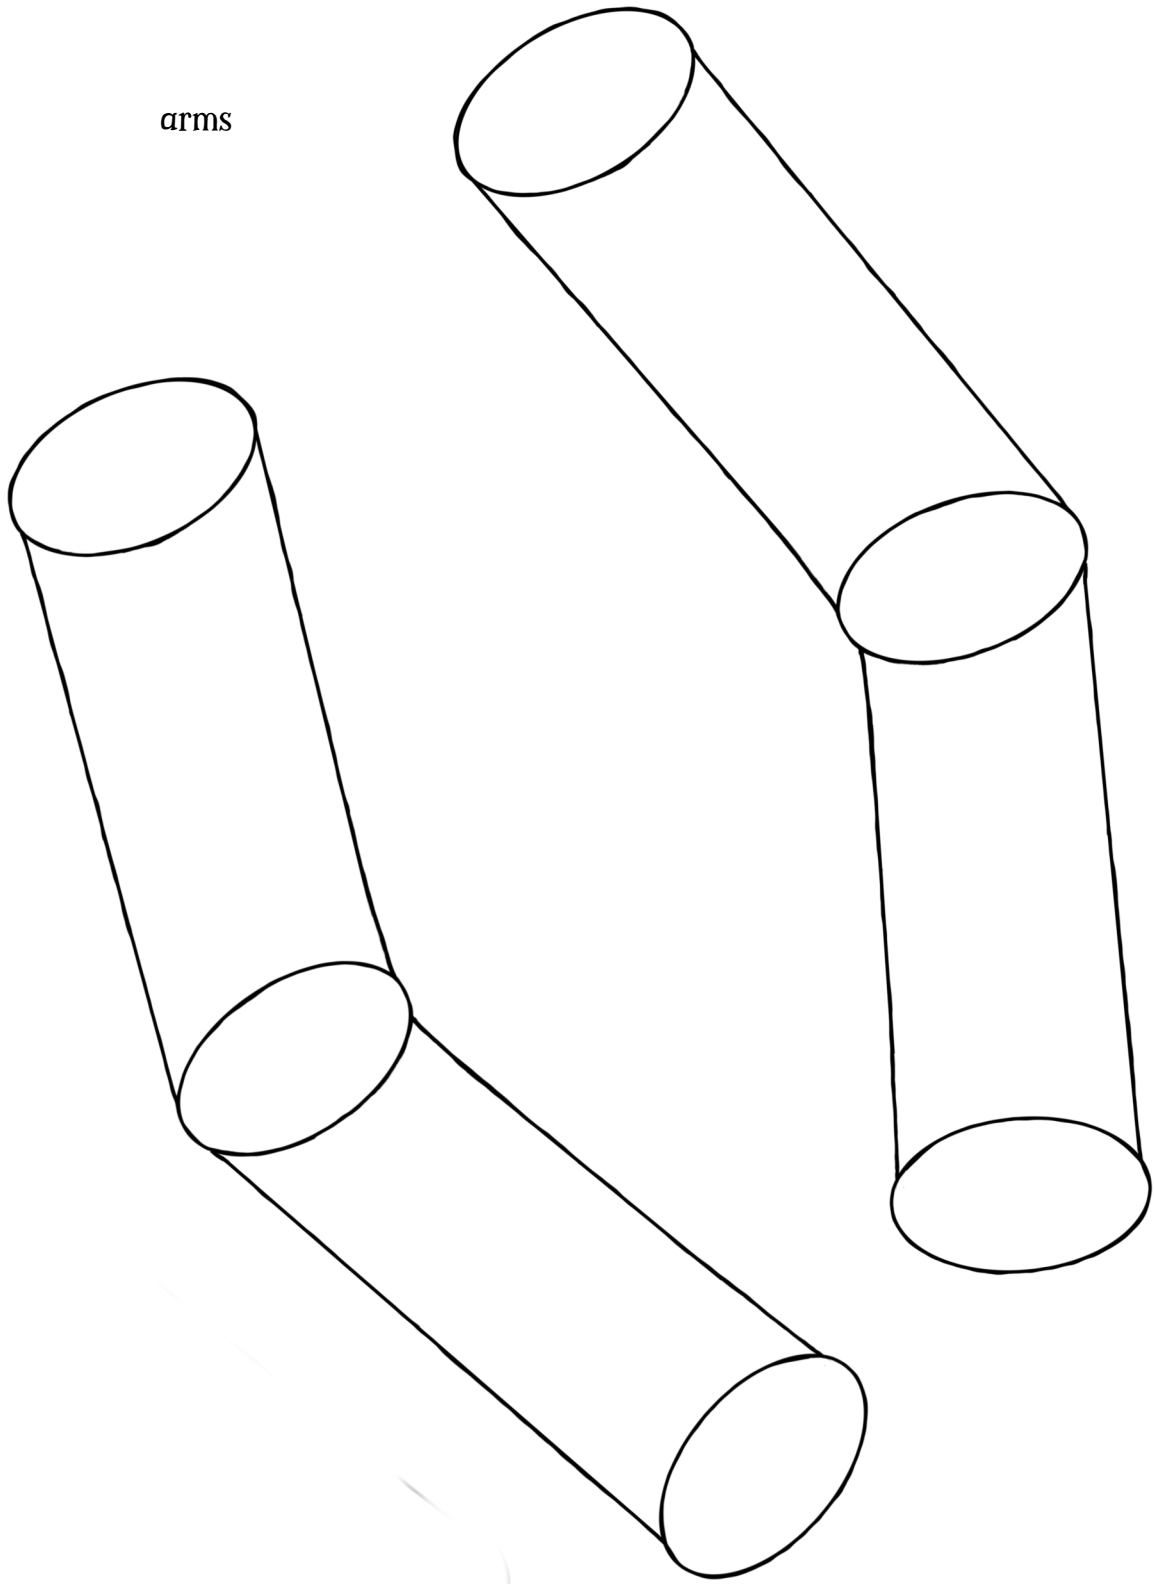

head

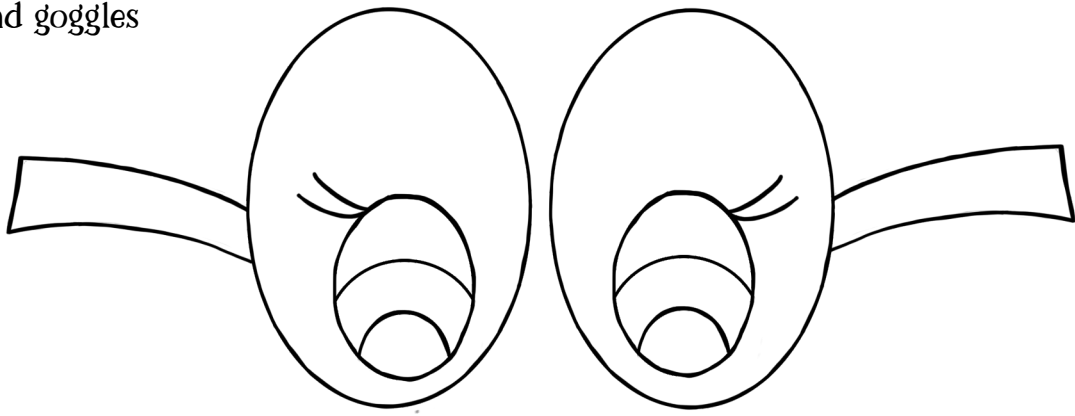

nose

parts

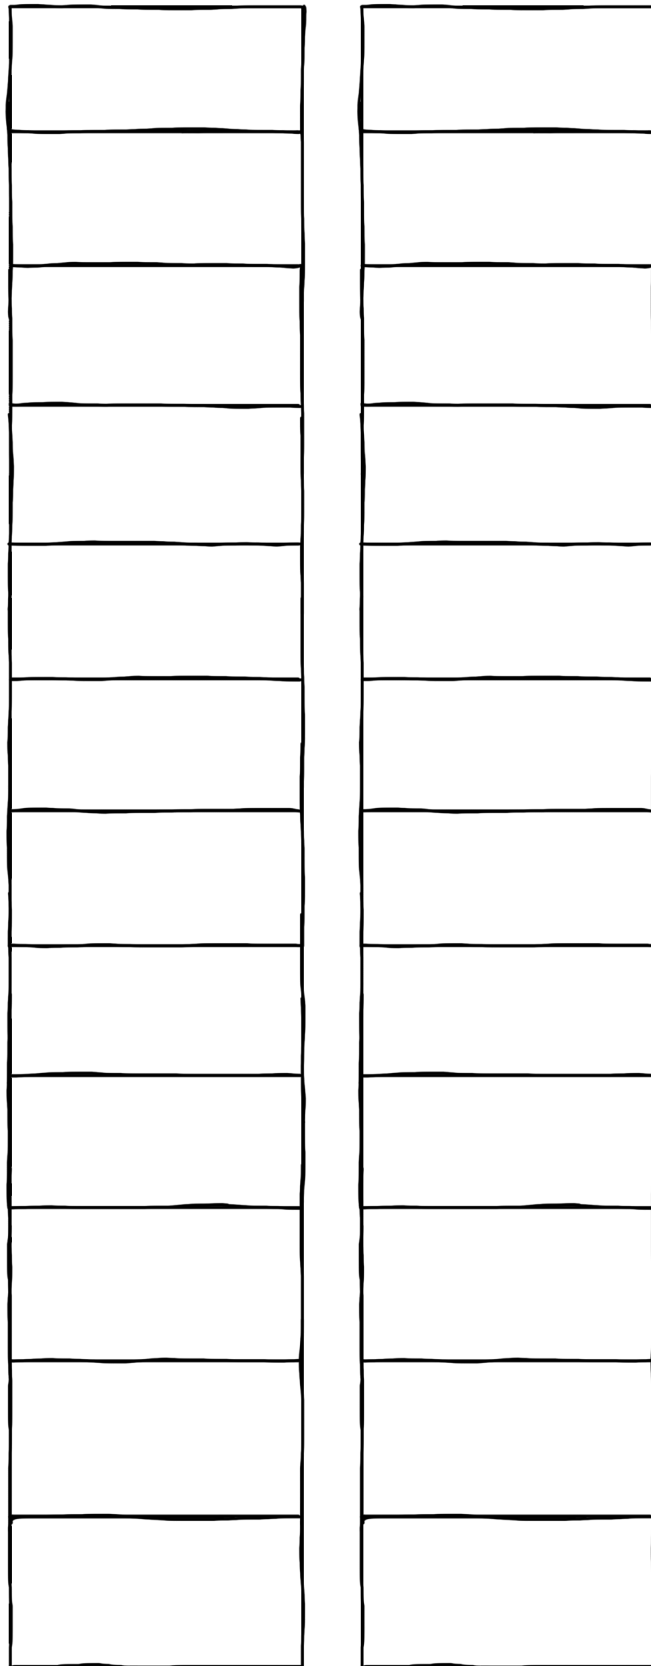

calculator

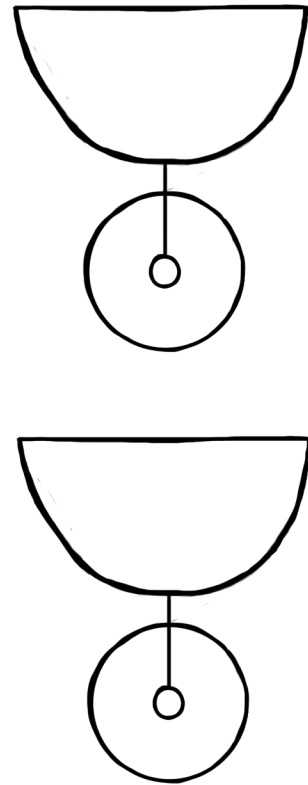

hands

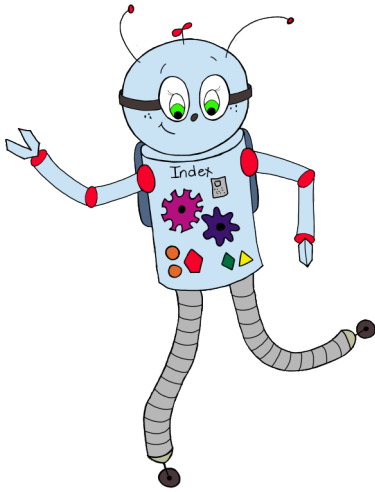

legs

wheels

Tell a Robot Story Game

Discover what robots can do with my Tell a Robot Story game.

Use these cards as the building blocks to design a robot and tell a story. Each time you play, the card combinations will be different, which means that the fun is endless!

Once you let your imagination go, there are so many things you can do with these cards.

Here are some of my favorites:

Use the cards to inspire your next robot creation. Draw a picture or build your special new robot.

Pretend to be a robot. Use the cards to tell you how you move, your special skill, and where you work.

Use the cards to create a robot character for a story. Don't forget to give your robot a name!

Materials needed for this game:

Robot story cards (included)

Scissors

Colored card stock or construction paper in 3 colors (optional)

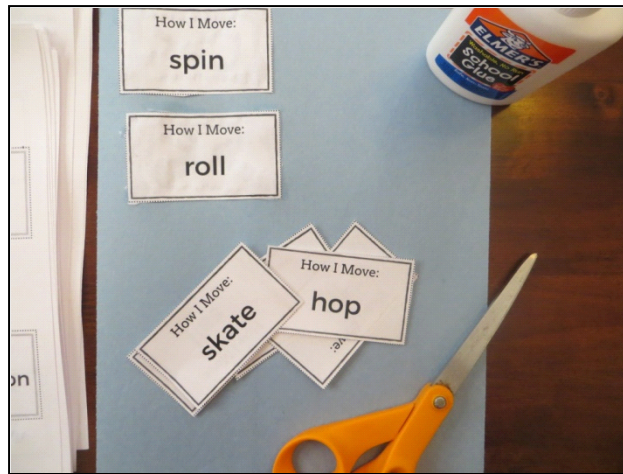

Glue (optional)

Your imagination

Set Up:

Print out the robot story cards either on plain paper or colored card stock (use a different color for each category).

Cut out the robot story cards. If you print them on plain paper, you can also glue them to colored paper to make them stronger.

Separate each category into its own stack (for a total of 3 stacks of cards):

How I Move

Where I Work

Special Skills

How to Play:

Flip your cards over face down.

Choose one card from each stack and let your imagination take it from there. Use the cards you picked up to inspire a picture, story, acting game, or whatever else you come up with.

Take turns and keep playing as long as you like.

Use these discussion questions as you play and make up your robot stories:

What special parts will your robot need to move, work, or do its special skill?

What other people or machines have this special skill?

Who else works where your robot works?

How do you think your new robot could help people?

How I Move:

spin

How I Move:

hop

How I Move:

swim

How I Move:

roll

How I Move:

fly

How I Move:

skate

How I Move:

walk

How I Move:

climb

How I Move:

sail

Where I Work:

**amusement
park**

Where I Work:

school

Where I Work:

under the sea

Where I Work:

rescue services

Where I Work:

farm

Where I Work:

house

Where I Work:

factory

Where I Work:

hospital

Where I Work:

space station
